

Fire Sprinkler Permit Requirements

Fire Sprinkler Permit Submittals Shall Include The Following:

- Valid contractor's license or equivalent certification
- Completed permit application with correct address and valuation
- Three sets of plans (Min 1/8" Scale) (A maximum of three sets will be stamped) Digital Plans are acceptable as well.
- PE or NICET Level III Stamp on all plans
- Minimum of one set of material cut sheets
- Hydraulic calculations
- Water supply information including a flow test which must be less than 1 year old.

The above list is not intended to be all inclusive of all requirements for a fire sprinkler submittal, but rather a guide to indicate the minimum requirements.
